

Manpreet Kaur

Senior Full-Stack Engineer · React · Next.js · Node.js · AI-Assisted Development

Melbourne, VIC | 0452 412 499 | manpreet.k9211@gmail.com | linkedin.com/in/kaurmanpreet921 | github.com/manpreetkaur9211 | portfolio-chi-ten-51.vercel.app

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 10+ years delivering production platforms across healthcare, fintech, transportation, and AI-integrated products. Specialising in React 19, Next.js 15 (App Router), TypeScript, and Node.js — with a current focus on AI-assisted development, building LLM-powered pipelines and embedding AI into existing product workflows. Proven track record of leading frontend architecture, mentoring engineering teams, and shipping complex full-stack systems at scale. Seeking senior full-stack roles with Melbourne-based teams.

TECHNICAL SKILLS

Languages: JavaScript (ES2022+), TypeScript

Frontend: React 19, Next.js 15 (App Router), Angular, Redux, RxJS, HTML5, CSS3

Backend: Node.js, Express, MongoDB, PostgreSQL, SQL, REST APIs, Microservices

AI & Tooling: AI-Assisted Development, Claude Code, Vercel AI SDK, Prompt Engineering

Cloud & Infra: AWS (SQS, S3), Firebase, CI/CD (Jenkins), Git, Bitbucket, Docker

Testing: Jest, React Testing Library, Playwright, Karma, Jasmine

UI & Design: Tailwind CSS, Material UI, Bootstrap, Headless UI, Figma

WORK EXPERIENCE

Yeyro Pty. Ltd. | Melbourne, AU

Jul 2024 – Present

Full-Stack Engineer

AI-powered wearables wellness platform delivering proactive health insights to individuals and enterprise clients.

- Lead Engineer:** driving AI integration across the platform — embedding LLM-powered automation (Claude API, Vercel AI SDK) into existing workflows to streamline operations and surface actionable health insights
- Architect:** designed and delivered the real-time notification engine using AWS SQS and WebSockets, improving alert latency and delivery reliability for proactive health notifications
- Sole Engineer:** built React 19 analytics dashboards for visualising AI-generated health datasets, supporting enterprise client health management workflows
- Sole Engineer:** built the Node.js health data processing backend integrating MongoDB and AWS for continuous ingestion of wearable sensor data

Daffodil Software Pvt. Ltd. | Gurugram, India

Jun 2015 – Jun 2024

Senior Full-Stack Developer

Leading IT services organisation with 1,000+ engineers across 5 offices in 4 countries, delivering custom software for global clients.

- Lead Engineer:** appointed frontend lead across 4 simultaneous client product platforms — owned architecture decisions spanning healthcare, transportation, fintech, and automotive sectors
- Tech Lead:** responsible for technical growth of 13 engineers and interns — structured mentoring through code reviews, pair programming, and architecture coaching that improved team delivery velocity
- Tech Lead:** drove adoption of TDD, Agile/Scrum, and engineering best practices across cross-functional teams of 10+ engineers
- Architect:** designed and implemented scalable REST API backends and microservices in Node.js, integrating across diverse tech stacks (Node.js, .NET, Java, C#)

KEY PROJECTS — DAFFODIL SOFTWARE

Exly | React, Next.js 15, MUI, Node.js, React-Admin, Storybook

India's fastest-growing creator economy platform — \$6.2M funded (Chiratae Ventures, 2024).

- Lead Engineer:** primary React/Next.js engineer for the consumer-facing platform — owned frontend delivery end-to-end for a product facilitating ₹300 Cr+ in creator earnings across India
- Architect:** built and owned the design system — scalable component library with React-Admin and Storybook, adopted as the UI standard across a team of 4 engineers
- Tech Lead:** mentored 2 engineers on React architecture, component design patterns, and code quality standards

Chalo | Angular, D3.js, Google Maps API, Node.js

India's #1 public transport platform — 100M+ monthly rides, 15,000+ buses, 37+ cities.

- **Sole Engineer:** solely responsible for the GPS fleet tracking product — built Zophop admin dashboards from zero to production, now monitoring 15,000+ buses powering 100M+ monthly rides across 37+ cities
- **Lead Engineer:** led zero-to-production delivery of TMTU — complete transport network management system covering routes, fares, and ticketing across 37+ Indian cities
- **Architect:** designed and implemented real-time map visualisations using D3.js and Google Maps API for live bus and device tracking

Denso E-Audit | React, Node.js, MongoDB, Twilio, AWS

Enterprise digital transformation for Denso Corporation, one of the world's largest automotive components manufacturers.

- **Lead Engineer:** responsible for complete technical delivery — led full-stack engineering of Denso E-Audit, replacing a paper-based audit process at one of the world's largest automotive manufacturers with a live video and digital evidence system
- **Architect:** designed Twilio integration for live video audit sessions with real-time evidence upload supporting both remote and face-to-face audit formats

HealTheia | Angular, Node.js, MongoDB, PubNub, OpenTok

Telemedicine platform for eye care — dual-portal system for providers and patients.

- **Sole Engineer:** sole engineer across both patient and provider portals — built appointment scheduling, live video consultations (OpenTok/WebRTC), and prescription management from scratch
- **Architect:** designed PubNub integration for asynchronous post-appointment doctor–patient messaging with virtual waiting room capability

EDUCATION & RECOGNITION

B.Tech, Information Technology — First Class Honours

2015

Government Engineering College, Ajmer, India | Merit Award — Top scorer across all engineering streams

Multiplier Award — Daffodil Software (2018). Recognised for exceptional project delivery impact.
